

OUNCE OF PREVENTION TRAINING WEBINARS

Introduced in 2007, the *Ounce of Prevention is Worth a Pound* tool kit was developed to address the growing epidemic of childhood obesity. The goal was to provide primary care providers with simple tools to educate parents of children in prevention strategies by making good nutritional and physical activity decisions for their children.

"This has been a great benefit to our office and we plan to continue using the program"
-Mark Winerman, MD
